

Is your current mortgage working as well as it should?

Just because your home loan was once competitive – it doesn't mean it still is! Ongoing changes to interest rates mean it's critical that you review your home loan now to see how you can save money and pay off your home loan sooner.

Robson Chartered Accountants now offers a comprehensive loan service, which includes reviewing your current loan on a no-obligation basis to ensure that you are still getting the best deal for your money. If you are not getting the best deal, then refinancing your current loan may be the answer!

Refinancing of your current home loan can:

- Reduce your total expense by reducing the interest you pay over the life of the loan;
- Reduce the term of the loan without increasing the monthly payments; and
- Pay off your home faster.

Do I need to refinance?

Whether you need to refinance will depend on your specific circumstances, but if you are planning to stay in your home for more than 3 years, or if you think there is a large difference between your interest rate and the current market rate, you may benefit from refinancing.

Our home loan service can provide you with a range of quotes and scenarios to help you decide whether you are better off to refinance.
